

ANKIT SINGH

Phone : (+91) 8777728034 | Email : ankit.as.singh12@gmail.com | LinkedIn : [ankitsingh12](#) | Github : [AnkitSingh-12](#)

Summary

AI Engineer Specializing in GenAI, Large Language Models (LLMs), and Agentic AI systems using LangChain, LangGraph, and CrewAI. Expertise in Prompt Engineering, NLP, Transformers, RAG pipelines, and Deep Learning (RNN, LSTM, GRU). Proficient in Python, SQL (PostgreSQL, MySQL), Machine Learning, data analytics, feature engineering, and scalable AI development .

Technical Skills

Programming Language: Python, Data Analysis (NumPy, Pandas, Data Cleaning, Scikit-Learn, TensorFlow, Keras, NLTK)

Database: Relational Databases (MySQL, PostgreSQL), Vector Databases (ChromaDB, FAISS, Pinecone)

GenAI & Agentic AI: LangChain, LangGraph, CrewAI, Embeddings (OpenAI, Hugging Face, Ollama)

Embeddings Text Representation: OpenAI Embeddings, HuggingFace, Ollama

Machine Learning : Regression and Classification (Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost)

Deep Learning & NLP: CNN, ANN, RNN, LSTM GRU, Encoders and Decoders, Transformers, NLP Techniques

Visualization : Matplotlib , Seaborn, Tableau, Power Bi, Dashboording

Tools and Software: Excel, GitHub, Jira, Streamlit, Google Colab, Jupiter Notebook, VScode

Soft Skills: Problem-Solving Ability, Communication Skills, Team work

Experience

AI Engineer, LBM SOLUTION Pvt Ltd.

OCR (WORKSBUDYY)

Nov.2025 – Present

- Designed and deployed a scalable Document Intelligence System using FastAPI, PaddleOCR, and Ollama (Phi-3/Llama 3.2) to automate structured data extraction from invoices, resumes, and visiting cards, reducing manual data entry efforts by ~70%.
- Implemented an end-to-end OCR + LLM processing pipeline, converting unstructured images/PDFs into validated JSON outputs using Pydantic schemas, improving extraction accuracy and ensuring schema-consistent responses for downstream systems.
- Built FAST APIs for automated document ingestion and processing, enabling real-time structured data generation with a fully local, open-source architecture (no third-party paid APIs), enhancing data privacy and deployment flexibility.
- **Tools & Technologies** - Python, FastAPI, PaddleOCR, Ollama (Phi-3 / Llama 3.2)

Data Analyst Intern, JSPIDERS Pvt. Ltd.

Student Performance Data Analysis

May 2025 – September 2025

- Conducted exploratory data analysis (EDA) on student performance datasets using Python (Pandas, Seaborn, Matplotlib) to identify trends, patterns, and actionable academic insights through data Visualization.
- Analyzed key performance drivers such as parental education, test preparation, gender, and lunch type, quantifying their impact on student scores across multiple performance groups.
- Provided data-driven recommendations to address achievement gaps, contributing to improved academic performance and reducing score variance by up to 20.

Tools & Technologies - Python, SQL, Numpy, Pandas, Visualization

Projects

LAPTOP PRICE PREDICTION IN MACHINE LEARNING

Source Code - [Laptop Price Predication ML](#)

- **Overview:** Developed a supervised machine learning model to predict laptop prices using key hardware features such as brand, processor, RAM, and storage. Applied data preprocessing, feature engineering, and regression techniques to build a reliable price forecasting system.
- **Outcome:** Improved prediction performance by training and tuning Linear Regression, Decision Tree, and Random Forest models, reducing error rates and increasing model accuracy.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, Jupyter Notebook, Linear Regression, Decision Tree, Random.

DIAMOND PRICE PREDICTION IN MACHINE LEARNING

Source Code - [Diamond price predication ML](#)

- **Overview:** Developed a regression-based machine learning model to predict diamond prices using key attributes such as carat, cut, color, and clarity. Applied data preprocessing and feature engineering techniques on a 53,940-record dataset to build a reliable price estimation system..
- **Outcome:** Improved model performance by 15% through one-hot encoding and feature optimization, achieving 95% prediction accuracy using regression algorithms with cross-validation. Delivered data-driven insights to support transparent pricing and informed purchasing decisions..
- **Tech Stack:** Python, Pandas, Matplotlib, Seaborn, Linear Regression, Decision Tree, Random Forest, Cross-Validation

Education

Chandigarh Engineering College, Punjab

Sept. 2020 - June. 2024

Bachelor of Technology in Computer Science & Engineering

Phulamati Gena Rawat High school , Bihar

March. 2020

12TH Science & Mathematics
